

## Style: Mastering Your Sense of Fashion

What you wear is how you present yourself to the world, especially today, when human contacts are so quick. Fashion is instant language. -Miuccia Prada Style means communicating who you are to the world. However, you cant do that unless you are in tune with who you are. Know thyself. This is the golden rule to finding your own sense of fashion. If only things were that easy. The first step to discovering your sense of style is to understand the different types of fashion personalities and to find out which one resonates with you the most. Sure, molding oneself into a particular label might sound like limiting a persons dressing options and killing his/her originality. But then again, Coco Chanel couldnt have said it better: Only those with no memory insist on their originality. The truth is, the best kind of fashion ideas are ones that inspired by the greats. The most brilliant fashion concepts have already been thought of and immortalized. Some disappear and are rediscovered decades later. So go ahead, feel free to steal. Steal inspiration from fashion magazines, from style bloggers, from fashion icons, from your environment, and from everyday life. In fashion, nothing is ever original so borrow to your hearts content. But do yourself a favor and know whom to borrow from. For those who wish to find their style spirit, this book will let them know where to begin. Inside, youll find a list and descriptions of the different types of style personalities. While cliches are often best avoided in fashion, in this case, knowing which style personality or personalities speak to you the most is the first step in your journey towards originality. After having a hint as to what your fashion style personality might be, the next step would be to cultivate that persona. You can do this by keeping only the fashion items that represent you and getting rid of those that do not represent you. This means that youll have to let go of a few things. Style is like

a story. The only way to perfect it is through rigorous editing. Inside this book is an easy two-step process on how to effectively perform a closet makeover while making the experience as painless as possible. One should remember that you're supposed to wear the clothes and not the other way around. Keeping up with the latest trends is not enough. You cannot master your sense of fashion unless you understand which clothes work to flatter your body type, to flaunt your best features, and to conceal your flaws. Inside this book, you'll find a list of the different body shapes and essential fashion tips for each body type. This book has been written for the aspiring fashionistas who wish to discover, develop, and master their individual sense of style. This book is for those who wish to learn how to achieve consistency in their wardrobe. It is for those who want to know how to de-clutter their clothing space; to know what needs to be in and what needs to be out. Included also in this book are comprehensive checklists of wardrobe essentials-- the backbones of a fashionable closet and a few helpful tips on how to choose them. Overall, this book is for those who want to change their lives through fashion.
