

LX ARCHITECTURE

The Grand Duchy of Luxembourg, in the heart of Europe, has experienced a remarkable ascent to an international financial centre during the past years. Its growth in importance and affluence is also increasingly reflected in high-quality architecture. It is time to pay tribute to the architecture of Luxembourg in a beautiful, bibliophile volume - also in order to obtain for it the international attention that it deserves. The first monograph on current architecture in Luxembourg contains projects by well-known architects such as Christian de Portzamparc, Christoph Ingenhoven, and I.M. Pei.
