

Younger & Slimmer YOU in 30 Days (Body & Mind Book 1)

Your body is programmable and you can reinvent yourself to a younger and slimmer you. Your Brain Holds an Image of Your Entire Body's Shape and Functions -- All in 3D Space. Our bodies contain memories and subconscious impressions etched in place during each moment of our lives. Incidents leave marks and sometimes scars that give shape to our character and personality ... But ... Life is a constant change. When the body becomes fixed and non responsive to change, it forms a shell, a mask, or armour ... It is protecting itself. As it clings to old pattern or memory, it ages To let the old armour go, and thus rejuvenate, we have to alert the body to change. Then we can supply it with new energy and a new pattern The brain holds an image -- a map of your entire body's shape and functions -- all in 3D space. It remembers this image and can respond to anything involving your body by updating the information in its map from sensory data. That's what I hope The DNA Rejuvenation Method will do for you. I hope it will change the way you see yourself. I hope it will inspire you to conduct an experiment with your own life, to use your energy to become the most fantastic, the most joyful, wondrous, beautiful, tender human being you possibly can. Your mind will be astonished by the beauty that's available when you put it on the spot. Deep peace will appear. Great ideas will materialise and expand. Joy will rise up. The only thing you need do is devote your mind only to things you want. If you want peace, think of peace. If you want love, think of love... think of beauty, in its many forms ... In reality, our universe is a moving, scampering energy field with infinite possibilities, but because our eyes have locked in on problem mode, that's what appears to be reality.... Who you think you are is not who you really are. You think you have a limited life something like 70 or 80 years and then you wrinkle up,

get rheumatism, and then Its all over. But this isnt any more true than that dream you had last night ... Your body is an impostor, a tiny fraction of who you really are. Ninety-nine percent of who you are is invisible and untouchable. This body that you think you are is just a speck of who YOU really are. Have you fallen for the trap that you, your body, and the world around you are nothing but matter. Its not easy standing on the brink of a revolution. These new ideas that scientists are finally starting to take seriously are challenging everything we believe about how our world works and how we define ourselves. Youre energy. At each moment, you mold and shape this energy by your consciousness. You do so with every thought, every intention, every action. How you feel; what you think, believe, and value; and how you live your life affect how the energy flows through you. To put it in simplest terms, this affects how you vibrate. And how you vibrate affects what you pull in from the interlocking, inter-balancing, ever-moving energy field in which you swim. You pull out of this field and into your world anything that happens to be vibrating on the same frequency or wavelength. Lets say youre feeling excited, joyful, and grateful. Those emotions send out high-frequency vibrations that magnetize more things to be excited, joyful, and grateful about. Anything with the same high frequency will prance on over to your energy field..... Your body is animated by your AnimaEnergySoulBeing ...Use it to your advantage...Your Body is a product of your perception of it
