

The Attraction of Space: To the Depths of the Unknown to Find the New

L'espace est objet de fascination, les hommes n'ont cessé de chercher à le deviner, l'explorer, tenter de le représenter face à un infini de plus en plus insondable et dont l'approche s'appuie maintenant sur des projections dans le domaine virtuel. Quelques-uns des témoignages de cette fascination, scientifiques, artistiques ou populaires dévoilent dans L'Attraction de l'espace les liens formels ou spirituels établis au XXe siècle - la vision en puzzle de l'espace du XVIe au XVIIIe siècle ayant cédé la place à une vision planétaire. Mais le 20 juillet 1969, les lignes des frontières se sont à nouveau déplacées avec la conquête de nouveaux espaces, hors de l'orbite terrestre. Au fond de l'inconnu! interroge ce pouvoir d'attraction si particulier, et sa propension à réunir l'ensemble des habitants de notre planète.
