

## The Unified Theory. God Creator and Author of Science

The Unified Theory. GOD CREATOR AND AUTHOR OF SCIENCE The Unified Theory brings together art, science, religion, modern physics. Art is the network that unites the fundamental forces of the Universe. The artwork of Salvador Dali and Melinda Garcia, sculptures and paintings, are the background to prove, in practice and in theory, the triumph of God as the Creator and Author of science. The book finally ends the debate between science and religion....Pondering about the minds standards as a replica of the standards that rule the dynamics of the universe, thus introducing, the concepts of modern physics, in the subjective elements of the intelligence. As for the Intellect of Laplace, we portray an essential new standard: The Fundamental Standard of Psyche Intelligence..If the gravitational force is manifested so spectacularly over the whole Universe, why doesn't it also manifest itself upon us on the same revolutionary way, leaving us to succumb on what we are, mere insignificant mortals? Of course not, as we belong to the extremely complex, we are the better party such as pearls from the highest spheres We believe as Einstein had believed, then we can add that God encompasses us to a full manifestation of His spheres. And further adding: God plays with spheres!. We can see on that a final triumph of the intelligence by accomplishing in itself the unification of all forces, by bringing here the most important spherical body that was missing and has not been considered within the set of other analyzed bodies by the modern physicists to conclude a complete Unified Theory: the body of the psychic sphere. Single to the level of extremely complex, this sphere by becoming itself a fully realized unified dimension, it simultaneously brings into play the participation of the most important force, the gravitational which in the opinion of the particle physicists it lacked to join the

set of forces in the processes of their observations. On the way to unification, we cannot evaluate the gravitation as just another pending agent, but as the primary manifestation of strength and power to govern the entire animation taking it to the climax of its performance, when it is capable of bending the geometry of space at the speed of time in which light is trapped, as we know. Like someone who deals with atomic matter involving the creation, the creator and the creature. Melinda Garcia
